“As a staff member of Darlingford Nursing Home, this space would be utilised by our residents. Wheelchair access would be a necessity in order for our residents to benefit from this space.”

“Accessible tunnel, accessible splash play, accessible and tactile, sensory garden- all below look great!”

Ultimately one of the main goals of the precinct was to ensure that all areas were accessible to all abilities. This includes DDA compliant footpaths as well as accessible elements within the designing. An addition to this is also the changing places toilet infrastructure within the change facility proposed.

“I foster kids aged between 2-16, inclusive to me is a playground that can cater to all ages all year round. I would like to see disability swing and sensory play also included.”

Yes a disability swing and sensory play was included

Plants

“Native floral ie wattles grevillea and shade”

Lots, let's make the gardens as spectacular as the playgrounds/ waterpark. Including bench seating. A place where seniors can sit and relax and enjoy the beauty of nature.

“That the new toilet block have family change rooms with toilets so parents can change their children together instead of gender division.”

Yes to above request

OFFICIAL

- *“Think a project like this is a good opportunity to clear some of the old pines / eucalypts and plant more appropriate species in these areas as part of works...again from memory a lot of old big trees particularly adjacent the pool.”*

Yes a removal plan will be developed and new trees established

This thing if it really does have running water wont be cheap to operate...imagine it would fire up in summer months and just be a normal playground rest of year.

Will operate as a normal playground without water in the winter months
